We will be finishing our mental health awareness series in February. Information about Signs of Suicide was sent out this past week to parents/guardians of 7th and 8th graders.

We will be having the FBI join us to present their program on extortion, since most students have access to a cell phone, tablet, or computer. The FBI and local law enforcement have seen a huge increase in the online targeting of youth. More specifically, our youth are being targeted for extortion based on their online activities. The presentation will educate our students on the predatory behavior, how to keep themselves safe online, when and why to tell an adult, and more.

Dear Potterville Public Schools,

Thank you for your generous gift of \$1,072.40 on 12/31/2025 to Wounded Warrior Project® (WWP). We sincerely appreciate your generosity. Your gift enables WWP to focus our efforts on meeting the needs of wounded warriors like Anthony Villarreal.

U.S. Marine Corps veteran Anthony Villarreal was on his final patrol in Afghanistan when a roadside bomb changed his life forever. He sustained third-degree burns over 70% of his body, a broken back, and numerous other injuries. After three months in a coma and over 70 surgeries, he faced a daunting question: "What now?" WWP was there when he needed it most, starting with a simple backpack in the hospital that showed someone cared. Through ongoing support, programs, and connection with fellow warriors, Anthony found strength and purpose. He now shares his story to help others find hope in the face of unimaginable challenges.

Thanks to you and the support of your network, WWP is changing the way our nation cares for veterans and helping them thrive for a lifetime. Your contribution is crucial in making sure no warrior is left behind. **Thank you!**

With gratitude,

Silver Diamine Fluoride (SDF) - A new dental treatment to fight cavities

BENEFITS OF SDF: Dental cavities are common in children, but now our dentists have a safe, painless alternative to traditional cavity drilling procedures called silver diamine fluoride (SDF). SDF is an FDA-approved antibiotic liquid used to help prevent cavities from forming, growing, or spreading to other teeth. The dentist simply brushes SDF on back teeth only.

Alternatives

- No treatment: The tooth may continue to decay and cause pain.
- Other options: fluoride varnish, a filling or crown, or extraction of the tooth.

Risks

- SDF treatment may not eliminate the need for a traditional filling.
- It's normal for SDF to stain the cavity brown or black—it means it's working.
- The healthy parts of the tooth will not be stained.
- SDF can cause temporary staining if it comes into contact with skin. The stain is harmless and should disappear in less than a week.
- SDF may cause a temporary metallic taste.

Questions? Call one of our care coordinators at 855-481-8639.
